MASTER OF ENERGY STUDIES

“We are educating highly skilled change agents to deal with the complex trilemma of energy affordability, reliability and environmental sustainability”

Professor Chris Greig
UQ Energy Initiative
The Master of Energy Studies is one of the few programs in the world that offers you a cross-disciplinary education with direct industry contact and practical experience. It provides the opportunity for individuals to gain a deeper understanding and appreciation of energy systems, responsible business practice and contemporary energy challenges.

**REPRESENT THE NEW BREED OF ENERGY PROFESSIONALS AND SOLVE COMPLEX ENERGY ISSUES**

Study at a truly international university ranked in the top 50 of the world located in the young, vibrant and rapidly-growing coastal city of Brisbane, Australia.

Learn from cutting-edge researchers and leading industry lecturers in flexible delivery modes.

Engage and network with industry professionals and government stakeholders and obtain hands-on practical experience.

**SHAPE THE FUTURE OF OUR WORLD**

As a Master of Energy Studies graduate you will be able to work and move across all industries and sectors as an innovator and developer, not least equipped with the necessary communications skills. You will be ready to take on leadership and management positions in a variety of environments, including industry, consultancy, government (policy/legislation/regulation) as well as non-governmental organisations and international agencies.
