

**Mr Phil Livingston  
Founder and Managing Director  
Redback Technologies**

Phil is an experienced executive, entrepreneur and operations professional with 13 years of direct Renewable Energy experience, driving business development, and exceeding business targets for a diverse range of governmental, not for profit and for profit organizations.

He is an adaptive strategic thinker specializing in the creation of entrepreneurial solutions to meet specific market requirements. Phil has demonstrated track record of growing start-ups into successful & profitable organizations and is adept at communicating complex technical information with non-technical audiences.

**Company profile**

Redback is a technology company focused on the development of advanced, low cost solar solutions for residential and commercial users. Redback's market leading integrated hardware and software technologies capture, store and manage solar energy, providing accelerated return on investment.

With a focus on quality and efficiency, Redback's streamlined inverter hardware incorporates power electronics, cloud system control and related switchgear into an aesthetically pleasing design, allowing for rapid integration, and thus low installed costs.

Redback's proprietary cloud based system puts power back in the hands of consumers. With the ability to analyse and control energy generation and consumption in real time, Redback affords consumers the ability to reduce energy costs, without sacrificing comfort. Best of all, Redback inverters are upgradable as new features become available, providing consumers with peace of mind.

Redback's management has over a century of experience in renewable energy generation, engineering, manufacturing, software development and energy market regulation. Founded in April 2015 and based in Brisbane, Redback Technologies is supported by the Microsoft Innovation Centre and has established alliances with leading edge partners including Sonepar and The University of

Queensland to ensure high quality, innovative and feature rich products that are delivered to our customers at disruptive prices. The Redback Smart Hybrid system is affordable, reliable and accessible to everyone.
