

Master of SUSTAINABLE ENERGY

2018
Semester: 1 or 2
Location
St Lucia
Study Mode
Intensive

We are educating highly skilled change agents to deal with the complex trilemma of energy affordability, reliability and environmental sustainability.

UQ's innovative postgraduate program in sustainable energy aims to equip the next generation of energy leaders, managers and decision makers with the skills and knowledge to address the challenges at the nexus of energy, climate change and sustainability.

As one of the few programs in the world to offer you a cross-disciplinary education with direct industry contact and practical experience, you will

gain a deeper understanding and appreciation of energy systems, responsible business practice and contemporary energy challenges.

The program is aimed at early and mid-career industry professionals who want to update their energy knowledge.

Career opportunities

You will become part of the new generation of energy professionals that help to solve complex energy issues never before resolved.

You will be able to work and move across all industries and sectors as an innovator, developer, and key communicator.

You will also be ready to take on leadership and management positions in a variety of environments, including industry, consultancy, government (policy/legislation/regulation) as well as non-governmental organisations and international agencies.

Master of Sustainable Energy

Master of Sustainable Energy
Program code: 5684

Program duration
1.5 years full-time
24 units (Semester 1 or 2 intake)

Entry Requirements

Hold an approved degree; and
3-5 years practical experience in a related field is required

Fees

For the most up-to-date program fees, please type in the name of your program at: www.uq.edu.au/study.

Fees are subject to annual indexation. ppl.app.uq.edu.au/content/3.40.03-international-student-refunds

What you will study

Working with international peers, you will complete eight core courses exposing you to the latest information on the range of energy technologies, climate change science and policy, energy markets, and the challenge for energy supply in developing countries.

After completing the core courses, you will consolidate your learning into an area of interest of your choice through a semester long research project, or a mix of research and elective courses, which can focus on technical, economic or social outcomes.

All courses are taught in five-day intensive blocks. Some courses also require online discussions and field trips.

Below is an indicative course plan you may choose to follow. For full course lists and more information, visit: future-students.uq.edu.au

Year 1	
Semester 1	Semester 2
Energy Principles and Renewable Energy	Energy Investment and Finance
Climate Science and Policy	Energy Markets, Law and Policy
Energy and Development	Energy Strategy, Innovation, and Entrepreneurship
Low Emission Technologies and Supply Systems	Energy Efficiency and Transport

Year 2
Semester 1
Professional Research Project OR Electives OR Mini-Thesis and Electives
